Metal parts manufacturing

STOMET is a specialist in serial production of various geometry metal elements used mainly in automotive industry.

Our business area covers production of prototypes as well as serial production of diverse metal parts.

CNC Machining

We offer production and delivery of metal parts as well as CNC machining service.

Available production capacity and competences allows the company to perform various machining processes including 3 and 5 axis milling, lathing and EDM/WEDM.

STOMET can completely satisfy full range of customer's needs.

We offer comprehensive services in terms of design, manufacturing and implementation of special machines covering also use of automatization and robotization.

We specialize in production of machines and devices connected with processing of rubber and plastics.

Custom-built machines

Automation and robotics

We design, manufacture and implement robotized and automated work stations according to customer's requirements.

We offer automation and robotization of existing production processes, reconstruction and modernization of used machines.

Maintenance services

We offer realisation of periodic inspections, maintenance and repairs of production means.

We specialize in maintenance of machines and devices dedicated for processing of elastomers and plastics.

We offer comprehensive service of maintenance inspections of material handling equipment with execution of resure.

Relocations and transfers

We specialize in providing expert services for the dismantling, relocation, and installation of machinery and equipment.

Our comprehensive approach ensures that projects are completed as efficiently and quickly as possible.

With a highly skilled team and the right equipment, we provide expected results every time.

Injection molds & custom- built tools

We design and manufacture injection molds for rubber and wide range of thermoplastics.

We offer proven solution for single and multi-component injection molds.

We manufacture special tools that meet specific requirements of our customers.

Quality Management

Quality management system based on the requirements of IATF 16949 and PN-EN ISO 9001 standards covers the entire STOMET company and applies to the all types of activity depending on its scope
